

Cybersecurity: Managed Endpoint Security

Managed Endpoint Security For Advanced Threat Detection and Prevention

Digital Agent's Managed Endpoint Security stops threats like ransomware, 0-day exploits, and fileless attacks more effectively thanks to an **extensive set of hardening, prevention, and detection layers**. This unified layered approach stops most threats automatically, before they turn into breaches.

Managed Endpoint Security and Sentry customers receive:

- HyperDetect Advanced Attack Prevention
- Fileless Attack Defense
- Sandbox Analyzer for Full Threat Context
