

vPenTest

What is a vPenTest?

Penetration tests allow organizations to assess their cybersecurity based on realistic attack scenarios. Using the results of a **vPenTest, automated by Vonahi Security**, your organization can identify ways to protect its most valuable data by reducing the number of attack vectors and accessible paths to sensitive resources and systems.

Benefits of vPenTest

AUTOMATED BY

vPENTEST

- DEMONSTRATE REAL-WORLD RISK
- EVALUATE CURRENT SECURITY DETECTION AND MONITORING CONTROLS
- PROVIDE BUSINESSES WITH REMEDIATION STRATEGIES
- UNDERSTAND HOW ATTACKERS TARGET SENSITIVE DATA
